

Employment Project

✓ Published

With your group members, produce a 10-minute presentation on employment in Japan in your chosen sector. Your presentation should include a summary of:

1. how recruiting works for this particular sector
2. differences between this sector or work environment in Japan and the US
3. what kinds of positions are available
4. what companies or institutions in this area are looking for in candidates
5. what current students can and should do to pursue this field

Each group will also interview a professional with experience in their sector who has generously offered to volunteer their time. You will receive contact information later **and are responsible for scheduling a Zoom meeting.** Interviewees are volunteering their time and you will need to work around their availability. CC your instructor on communiqué and use [proper business email etiquette](#)  (<https://www.indeed.com/career-advice/career-development/how-to-write-a-professional-email>). Use the experience and knowledge you receive from your interviewee as you put together your presentation.

Creation of a list of resources (links to useful information like recruiters, job fairs, company websites, blogs, etc) is also required. This should be included at the end of the presentation; presentations will be uploaded to Canvas for your classmates to use.

Sectors are:

- Academia
- Asset Management and Financial Services
- International Business Partnerships
- TEFL (Teaching English as a Foreign Language)
- Tourism
- Translation
- Video Game Development
